

"I like that when our son does something well, the tablet cheers for him. His face lights up, and he wants to get that recognition. The encouragement is wonderful. Seeing him succeed, and getting the reinforcement from a tablet that is speaking to him, that is the best. His teacher thinks it's great, too. She says the educational apps reinforce what our kids are learning at school."

Little Scholar

New Educational Tablet for Kids

"Two things set this tablet apart from the swarm of similarly-priced Android competitors: the overall ease of the out-of-box experience... and the quality and quantity of pre-loaded content."

—Warren Buckleitner, Ph.D.,
