

# PAX<sup>2</sup> USER GUIDE

## About PAX

PAX is the best-in-class compact portable vaporizer that sets the standard for simplicity of use, elegant design, and exceptional vaporization experience.

## In the Box

PAX 2 will come with everything you need to use and enjoy the device. Included in the box are:

✂ PAX

✂ Cleaning kit

✂ 2 Mouthpieces

✂ USB Charging Cradle

## Charging

Before using PAX, you'll need to make sure it's charged. Connect the cradle and cord provided to your computer or adaptor, then place PAX on the cradle to charge.

## Getting Started

Once PAX is charged, you're ready to get started. Remove the magnetic oven lid and pack with your loose leaf material. It should be packed firmly for optimal flavor and vapor performance. Then place the oven lid back on the device.

## Power On

Power on with a short press on the button located in the center of the mouthpiece. Your device will take between 30 seconds and one minute to heat up. Once the LED lights turn green, you're good to go. A gentle, cigar-like draw is best to start.

## Temperature Settings

To change the temperature of the oven, hold down the mouthpiece button for an extended press when the device is on. You'll know you're in temperature set mode once the LED petals change from green to yellow, orange or red. Exit temperature set mode by holding down on the mouthpiece button for an extended press, or by shaking the device.
